SORNALATHA S

Software Developer

Namakkal, Tamil Nadu | +91 9626172343 | sornalathas2002@gmail.com

PROFESSIONAL SUMMARY

Software Developer with hands-on experience in backend development using Laravel and PHP, frontend development with React.js, and MySQL database design. Skilled in REST API development and integration, production deployment, data migration, and production support for business applications including CRM, LMS, Inventory, and POS systems.

PROFESSIONAL EXPERIENCE

Software Developer

▸ Retail POS & Inventory Management System

Aug 2026 – Present

Retail point-of-sale and inventory management system for a retail store chain.

Tech Stack: PHP (CodeIgniter) • MySQL • JavaScript • jQuery • AJAX • Bootstrap • CSS3

- Built and customized core sales register workflows, implementing real-time cart calculations, line-item management, and transaction handling
- Implemented an AJAX-driven price verification check that flags below-cost selling prices and prompts a confirmation before completing the sale
- Designed a cart-level discount engine supporting fixed-amount and percentage deductions, with proportional recalculation, session persistence, and tax adjustments
- Implemented QR code and barcode generation for product and receipt labeling, optimized for thermal label printers
- Redesigned sales receipts, invoices, and print stylesheets, standardizing layout and adding scannable receipt QR codes

▸ Multi-Franchise Learning Management System (LMS)

Dec 2025 – Aug 2026

Production Support: Aug 2026 – Present

Online learning platform for course, student, and batch management.

Tech Stack: Laravel • PHP • MySQL • Blade • REST APIs • RBAC

- Developed an LMS platform using Laravel, MySQL, and REST APIs for course, student, and batch management
- Implemented the course lifecycle, including creation, scheduling, enrollment, student tracking, and attendance management
- Built payment processing and invoice generation with webhook integration, plus automated PDF certificate generation
- Implemented role-based access control (RBAC) and dynamic UI using Blade, and optimized performance through caching and database tuning
- Migrated student, batch, and master data from legacy systems, validating records and resolving inconsistencies ahead of production deployment
- Deployed the application on AWS EC2, managing environment configuration, domain setup, and SSL
- Provide ongoing production support, resolving data migration issues and implementing configuration changes

▸ Inventory & POS Management System

Sep 2025 – Jul 2026

Retail inventory, billing, purchase, and GST compliance management solution.

Tech Stack: Laravel • PHP • MySQL • Bootstrap • REST APIs

- Built a full-featured Inventory & POS Management System in Laravel with customer/supplier management, barcode generation, sales, purchases, returns, role-based access control (RBAC), and reporting

- Implemented automated invoice emailing and a GSTR tax module generating GST-compliant reports and Excel exports to support tax filing
- Developed the Laravel backend covering inventory, sales, and purchase workflows, including tax calculations and server-side validation
- Enhanced the admin dashboard with real-time analytics and filters for business operations
- Built REST APIs for frontend-backend integration across inventory, sales, and purchase modules

▸ Reward-Based CRM for Pharmaceutical Sales

Sep 2024 – Aug 2026

Reward-based CRM for pharmaceutical sales billing and distributor management.

Tech Stack: PHP • jQuery • AJAX • MySQL

- Developed CRM modules for sales billing, customer configuration, rewards, and sales entry workflows for pharma operations
- Implemented reward logic using OBV, OPV, and ODV models with target validation and excess handling
- Built dynamic UI features including AJAX-driven filters and modals for reporting and navigation
- Integrated database-driven workflows for business automation, adding auto-save, validations, and guided multi-step forms
- Migrated data from Excel and legacy databases, performing validation, cleansing, and duplicate handling ahead of production deployment
- Deployed the application on Hostinger shared hosting, managing environment configuration, domain, and SSL

▸ Mobile Employee Attendance & Field Tracking App

Jan 2025 – Jun 2025

Frontend Developer

Workforce operations platform for attendance, leave, and field-location tracking.

Tech Stack: React.js • Laravel • REST API • JWT • MySQL

- Built a React 18 SPA with protected routing, role-based UI access, reusable hooks, and centralized state management using Context API and Axios interceptors
- Developed core modules — Dashboard, Attendance, Leave, Location, Media & User Management — using optimized React patterns (useState, useEffect, useMemo, useCallback) and reusable UI components
- Integrated file uploads, Google Maps, charts, lazy loading, and pagination to improve performance and usability

TECHNICAL SKILLS

Frontend: React.js • JavaScript (ES6+) • HTML5 • CSS3 • Bootstrap • jQuery

Backend: PHP • Laravel • Blade • Livewire • REST API Development

Database: MySQL • Eloquent ORM • Database Schema Design • Query Optimization

Tools & Integration: Git • GitHub • Postman • AJAX • RBAC • Webhook Integration

Deployment: Hostinger • AWS EC2 • Domain & SSL Configuration

Soft Skills: Problem Solving • Communication • Adaptability • Team Collaboration • Time Management

EDUCATION

Master of Science in Mathematics (M.Sc.)

Aug 2022 – May 2024

Thiruvalluvar Government Arts College, Rasipuram, Tamil Nadu · **Completed**
